## BBZ RESIN INJECTION SYSTEM

**Project:** Distribution Vault # 77  
Pine and Peck Streets  
Providence, Rhode Island

**Owner:** Narragansett Electric Company

**Injection System:** BBZ Duroseal Inject 2000

**Completed:** March 1999

For years, Narragansett Electric Company (NEC) was contending with constant flooding of Vault # 77, located in downtown Providence. Numerous times, the water entering this concrete structure damaged the expensive transformer located inside.

NEC, after spending many dollars attempting to stop the inflow into the vault through other failed methods contracted with Jean's Waterproofing, Inc. (JW) to eliminate this costly nuisance.

JW proposed to NEC the injection of various conduits entering the vault, as well one area in the vault's wall. JW utilized BBZ Duroseal Inject 2000 in this project. After one days work of JW's experienced injection team, NEC after many decades of flooding, now has a vault which is free of damaging water.
